

**Subject Line:** Simplify portfolio operations with IT Managed Services

Hi there,

Gaining visibility into and maintaining disparate IT systems across a portfolio of companies can be a challenge: Each company has different budgets, skillsets, and software. That's if they have an IT department at all.

**Full Service Outsourced IT Services (MSP)**

beiNVENTiV's Computer Complete Care (CCC) acts as your IT department to manage everything from daily IT needs and cyber security to long-term strategic planning. This ensures your IT infrastructure is always aligned with your business goals without the need to build, manage, and maintain an in-house IT team.

We keep your IT running smoothly, allowing you to focus on your core business. Our tailored Computer Complete Care service can provide the following:

- Technical Support
- Security strategy
- Compliance
- Server administration and monitoring
- Networking support
- Microsoft 365 or Google Workspace support and administration
- Ongoing strategic advice

We do all this with ONLY SENIOR level resources who average over 20 years of experience.

We're proud to offer our customers fast response times and flexible month-to-month contracts that provide your PortCos with the service they need without locking you into expensive terms.

I'd love to discuss how our experts can help. When are you available for a 30-minute call?

Best regards,

**Jeff Fantalis, CEO**
